## AT THE SEASIDE; DOUGH 'SAND' SCULPTURES

### INSTRUCTIONS:

1. Gather utensils such as teaspoons, bottle tops, small containers, or plastic cups.
2. Push playdough against the small containers or cups to shape your castle towers and walls. Tip: If using disposable cardboard cups, cut out the bottoms to easily push the playdough out.
3. Gently remove the playdough from the molds. Make as many individual 'castles' as you like and arrange them together to build a larger castle.
4. Decorate Your Castle: Use the end of a spoon to draw bricks and doors. Press bottle tops into the playdough to make windows.
5. Let your creativity run wild — build moats, towers, and bridges, or even create a whole playdough kingdom!

### DIFFERENTIATE:

- Older kids may prefer to produce a podcast or you tube episode, sharing whatever they are most interested in right now.
- Younger kids may feel more confident doing something more familiar, like singing a nursery rhyme with actions or props

### EXTEND:

- Go on a nature hunt before hand, to find stones and leaves to decorate your sculpture with. Maybe you'll find a feather or a leaf that will make the perfect flag!
- Discover what other beach themed structures can you make

### ALTERNATIVE RESOURCES:

There are lots of great playdough recipies on the Internet that can be made using flour, oil and salt. However you could also use kinetic sand or play sand
